

## WEALTH PASSPORT™ PARTNERSHIP REPORTING CAPABILITIES

### AGGREGATE AND TRACK YOUR PARTNERSHIP ASSETS WITH EASE

---

*Serving the needs of family members, family officers and their advisors*

**The Partnership  
Reporting capability  
reports partnership  
assets at the  
partner level.**

Family limited partnerships allow members to pool assets and receive greater access to top-tier managers. However, reporting on these assets can be challenging. Wealth Passport's Partnership Reporting capability can accurately aggregate partnership interest assets with direct holdings. These aggregated values are made available within Wealth Passport's Net Worth Summary and its detailed report templates.

#### ASSET "PEEK-THROUGH" CAPABILITY

The Wealth Passport Partnership Reporting application allows you to input and apply individual ownership percentages to underlying assets in a partnership. The asset "peek-through" functionality enables partners to assess their ownership of the partnership assets easily and accurately. The following example illustrates how Wealth Passport aggregates and reports on directly owned assets and indirectly owned partnership assets.

- John Smith has 500 directly owned shares of NTRS
- John Smith also has 25% ownership of Partnership A
- Partnership A holds 1,000 shares of NTRS
- John Smith has 250 indirect shares of NTRS (1,000 x 25% partnership interest)
- Wealth Passport's Partnership Reporting capability allows John Smith to see that he has the equivalent exposure to 750 shares of NTRS (500 direct shares + 250 indirect shares)

#### ACTIVITY TRACKING

Periodic cash flows for limited partnerships may be posted to the partnership interest account. This will allow an individual partner to run a combined income report and see the income allocations received from the partnership distribution. The partner can view what the partnership allocated in gains, income and expenses in conjunction with all activity in the partner's directly owned accounts.
