Northern Trust World Custom ESG Minimum Volatility Equity Index UCITS FGR Fund: Unit Class B EUR

A Fund of Northern Trust UCITS FGR Fund

ISIN: NL0012040711

Management Company: Northern Trust Fund Managers (Ireland) Limited

OBJECTIVES AND INVESTMENT POLICY

The investment objective of the Fund is to closely match the risk and return characteristics of the MSCI World Custom ESG Minimum Volatility (EUR) Index (the "Index") with net dividends reinvested. The Fund invests in equities (that is, shares and other similar kinds of assets) issued by or relating to companies included in the Index.

The equities will be traded on stock exchanges in the countries included in the Index. These countries include Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. Where access to stock exchanges in those countries is not practicable, investments may be made in markets elsewhere. Further details of the Index constituents, weightings and methodology can be obtained from the Investment Manager or navigated to from the following links: www.msci.com/index-methodology and www.msci.com/constituents. MSCI's website (www.msci.com) contains more detailed information about the MSCI indexes.

The Fund uses a sample based physical replication model whereby it seeks to track the risk and return characteristics of the Index by buying most or all of the stocks of the Index. This means it may not hold all the same assets as the Index or hold assets in the same proportion as the Index, and the Fund may not match the Index performance.

The Index is calculated by optimising the MSCI World Custom ESG Index (the "Parent Index") to provide a portfolio with minimum volatility characteristics. The process takes into account sets of constraints (such as sector and country weights

relative to the Parent Index) that help to ensure the index is easily replicated while controlling turnover within the portfolio.

The Parent Index corresponds with the MSCI World Index with the exclusion of companies that do not meet set criteria, namely companies that (i) breach the UN's Global Company Compact Ten Principles (ii) breach certain rules in relation to the production and other activities involving tobacco (iii) manufacture certain weapons or their components. For further details on the UN Global Compact principles, please refer to www.unglobalcompact.org/AboutTheGC/TheTenPrinciples/index.html.

The Fund may use derivatives and other financially linked instruments (namely currency forwards and exchange traded futures) to achieve its objective and to reduce risk, minimise costs or generate additional capital or income.

Target Market: This Fund is appropriate for clients who plan to invest over the long term; for example 5 years or more; and are looking for a passively managed investment in lower volatility securities in the relevant market(s) with ESG principles implemented according to a defined set of exclusions. This Fund may be appropriate for clients who can benefit from the tax status of the FGR fund range.

Income from units can either be re-invested or distributed semi-annually at your request.

You can buy or sell units daily (on each business day of the Fund). An application must be received by the Fund's administrator before 14.00 (Dutch time) on the business day prior to the relevant dealing day.

The B, D, F, H, J, L, N, P, R, T, V, X and Z Classes of Units are issued to Investors which are exempt from income tax or entitled to a full refund of Dutch dividend withholding tax and for which the Fund is not entitled to a full tax rebate (afrachtsvermindering).

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The rating is based upon changes in prices of the equities held by the Fund.

Investments across markets are affected by exchange rate risk, where the currencies may fluctuate in value.

Performance volatility can be increased or reduced due to fluctuations in the currencies in which the Fund invests.

The following risks are material in addition to the risks captured by the indicator above:

Liquidity Risk – Some recognised exchanges are less liquid or more volatile which may affect the price received and time taken when selling investments. Small capitalisation companies are also less liquid and this may result in fluctuations in the price of shares.

Investment Risk - The Fund may not achieve its investment objective. An investment in any Fund involves investment risks including possible loss of the amount invested.

Futures and Options Risk - In case of bankruptcy of the broker, there is no guarantee collateral held by the broker will be returned to the Fund. In the event of bankruptcy of the counterparty, the option premium and any unrealised gains may be lost.

Valuation Risk - A position in the Fund may be valued incorrectly, as some prices may be uncertain at a point in time.

For more information about risks, please see the section entitled "Risk Factors" of the Fund's prospectus and supplement at www.fgrinvesting.com/en/.
