INVESTMENT OBJECTIVE

The Portfolio seeks to maximize current income to the extent consistent with the preservation of capital and maintenance of liquidity by investing exclusively in high-quality money market instruments. The Portfolio seeks to achieve its objective by investing in a broad range of government, bank and commercial obligations that are available in the money markets.

PORTFOLIO FEATURES

- The Portfolio offers the potential for a higher yield than a portfolio of government securities, with limited additional risk, by being able to invest in money market eligible corporate securities
- Top ratings from Standard & Poor's and Moody's highlight the Portfolio's high credit quality and relative safety
- The Portfolio invests primarily in the highest credit quality securities — First Tier securities
- As of October 11, 2016, this Portfolio was designated as an "institutional money market fund." As a result of its designation, the Portfolio will be subject to liquidity fees, redemption gates and have a variable net asset value.

7-Day Current Yield History (Shares class)

QUARTER END

MONTH END

2016					2017						
Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul
0.42%	0.52%	0.58%	0.61%	0.70%	0.76%	0.79%	0.90%	0.92%	0.97%	1.13%	1.16%

Total Returns (as of June 30, 2017)

1-Year	3-Years	5-Years	10-Years	Since Inception
0.75%	0.34%	0.23%	0.65%	1.35%

Performance quoted represents past performance and does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown here. Performance data current to the most recent month end is available by calling 800-637-1380. Performance information for the Williams Capital Shares of the Portfolio prior to 06/30/2017 are for Shares, another class of shares of the Portfolio that is offered in a separate prospectus. The Williams Capital Shares would have substantially similar annual returns because the Williams Capital Shares are invested in the same portfolio of securities, with the same management fee, and the annual returns would differ only to the extent that the classes have different expenses. The Williams Capital Shares are offered exclusively to clients of The Williams Capital Group, L.P. Williams Capital Group, L.P., is not affiliated with Northern Funds Distributors, LLC or Northern Trust.

Northern Trust Investments, Inc. has contractually agreed to reimburse a portion of the operating expenses of the Portfolio (other than certain excepted expenses, i.e., acquired fund fees and expenses, service fees, the compensation paid to each Independent Trustee of the Trust, expenses of third party consultants engaged by the Board of Trustees, membership dues paid to the Investment Company Institute and Mutual Fund Directors Forum, expenses in connection with the negotiation and renewal of the revolving credit facility, extraordinary expenses and interest) to the extent the "Total Annual Portfolio Operating Expenses" exceed 0.15%. This contractual limitation may not be terminated before April 1, 2018 without the approval of the Board of Trustees. In the absence of these reimbursements, yield, total return, growth since inception and dividends would have been reduced. Total return is based on net change in NAV assuming reinvestment of distributions. The 7-day current yield more closely reflects the current earnings of the Portfolio than the total returns. The Portfolio also includes voluntary reimbursements that were in effect prior to November 30, 2013. Without the voluntary expense reimbursements, the 7-Day current yield prior to November 30, 2013 would have been lower.

PORTFOLIO MANAGERS

JENNIFER GRECA, CFP® | Began career in 2000 With Northern Trust since 2000

Ms. Greca received a BBA in international business and human resource management from the University of Toledo and an MBA with a concentration in finance from Loyola University, Chicago. She also holds the CERTIFIED FINANCIAL PLANNER™ certification.

PETER YI, CFA® | Began career in 2000 With Northern Trust since 2000

Mr. Yi received a Bachelor's degree from the University of Michigan and an MBA from the University of Chicago Booth School of Business. He is an active CFA charterholder and a member of the CFA Institute and the Investment Analysts Society of Chicago.

PORTFOLIO MANAGER COMMENTARY

As expected the Federal Reserve left rates unchanged at their July meeting. However they continued to prepare the market for the start of their balance sheet normalization process. Many market participants expect the announcement at their September meeting, especially after the July Federal Open Market Committee (FOMC) statement mentioned this would begin “relatively soon.” The markets appeared less convinced in July that the Federal Reserve (Fed) will increase their benchmark rate once more this year as the FOMC dot plots would suggest. Recent Fed speak also highlights perhaps that some are less inclined to vote in favor of an additional hike without more evidence supporting their view that the lower inflation readings are temporary. We continue to position ourselves conservatively with a neutral duration strategy. Liquidity and principal preservation remain our primary objectives.

Annual Expense Ratios (Williams Capital Shares)

Net Expense Ratio** 0.15% Gross Expense Ratio 0.17%

*The inception date is that of the Shares class. As of July 31, 2017, the Williams Capital Shares class has not been funded.

**Includes contractual expense reimbursements that, if not extended, will end on April 1, 2018. Unaudited as of July 31, 2017.

Market Value NAV is calculated using current market quotations, or an appropriate substitute, to value a portfolio. This NAV is calculated to four decimal places and is currently being used for transacting purchase and sale activity.

You could lose money by investing in the Portfolio. Because the share price of the Portfolio will fluctuate, when you sell your shares they may be worth more or less than what you originally paid for them. The Portfolio may impose a fee upon sale of your shares or may temporarily suspend your ability to sell shares if the Portfolio's liquidity falls below required minimums because of market conditions or other factors. An investment in the Portfolio is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Portfolio's sponsor has no legal obligation to provide financial support to the Portfolio, and you should not expect that the sponsor will provide financial support to the Portfolio at any time.

- 7-day current yields are based on the relation between the fund's net asset value per share on the date indicated and the annualization of the fund's net dividend income for the 7 days ended on the date indicated. The yields shown do not include capital gains and may, therefore, differ slightly from the actual distribution rate.
- Credit ratings are as of March 3, 2017 for Standard & Poor's and October 4, 2016 for Moody's. They are subject to change. AAAM rating by Standard & Poor's is obtained after Standard & Poor's evaluates a number of factors, including credit quality, market price, exposure and management. Money market funds rated Aaa-mf by Moody's are judged to have a very strong ability to meet the dual objectives of providing liquidity and preserving capital. Ratings are based on an evaluation of several factors including: objective measures to assess portfolio credit quality as well as market and liquidity risks in stress scenarios, sponsor quality, the fund's management, and legal factors. For more information about the ratings provided by Moody's and Standard and Poor's, please visit their websites at www.moody.com and www.standardandpoors.com, respectively.
- The fund is a managed portfolio and its holdings are subject to change.
- The holdings percentages are based on net assets at the close of business on July 31, 2017 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes.
- Quality Distribution is determined as follows: A security is classified as Tier 1 when two or more of the three nationally recognized statistical rating agencies have assigned a rating in their top short-term ratings category (A1+ and A1 for Standard & Poor's, P1 for Moody's and F1+ and F1 for Fitch). A security is classified as Tier 2 when two or more of the ratings assigned to that security are below the top short-term ratings from the agencies (this would include ratings of A2 for Standard & Poor's, P2 for Moody's and F2 for Fitch). If a security has only two short-term ratings available, the lower rating is used to define the Tier; i.e. a split rating of A1/P2 is considered Tier 2. If only one short-term rating is available for a security, the Tier is determined by that one agency. A security is classified as Tier 3 if it does not meet the definition of Tier 1 or Tier 2, has two or more ratings below A2, P2, or F2 or if the security does not have a short-term rating.
- The gross and net expense ratios are as of the most recent prospectus.
- The Maturity Distribution data is measured using the lower of the stated maturity date or next interest rate reset date. The weighted average maturity (WAM) of a money market portfolio is the asset-weighted days until maturity of each security in the portfolio. The days until maturity for WAM are calculated using the lower of the stated maturity date or next interest rate reset date. The weighted average life (WAL) of a money market portfolio is the asset-weighted days until maturity of each security in the portfolio. The days to maturity for WAL are calculated using the lower of the stated maturity date or demand feature date.
