The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Northern Trust World ESG Leaders Equity Index Fund: Unit Class A USD

### A Fund of Northern Trust UCITS Common Contractual Fund

ISIN: IE00BF0SY517

Management Company: Northern Trust Fund Managers (Ireland) Limited

## OBJECTIVES AND INVESTMENT POLICY

The investment objective of the Fund is to closely match the risk and return characteristics of the MSCI World ESG Leaders Index (the Index) with net dividends reinvested. The Fund invests in equities (that is, shares and other similar kinds of assets) issued by or relating to companies included in the Index.

The equities will be traded on globally recognised stock exchanges in the countries included in the Index. These stock exchanges are in countries which include, but are not limited to, Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. Where access to stock exchanges in those countries is not practicable, investments may be made in markets elsewhere. Further details of the Index constituents, weightings and methodology can be found at: <https://www.msci.com/constituents> and <https://www.msci.com/index-methodology>.

The Fund uses a sample based physical replication model whereby it seeks to track the risk and return characteristics of the Index by buying all or most of the stocks of the Index. This means it may not hold all the same assets as the Index or hold assets in the same proportion as the Index, and the fund may not match the Index performance.

The Index is a capitalization weighted index that provides exposure to companies with high Environmental, Social and Governance (ESG) performance relative to their sector peers, based on MSCI's ESG ratings. Companies found to be in violation of international norms (for example, facing very severe controversies related to human rights, labour rights or the environment) and companies involved

in controversial weapons (landmines, cluster munitions, depleted uranium, and biological and chemical weapons) are excluded from the Index. The Index is constructed by aggregating the following regional Indices - MSCI Pacific ESG Index, MSCI Europe & Middle East ESG Index, MSCI Canada ESG Index and MSCI USA ESG Index. The parent index is MSCI World Index, which consists of large and mid-cap companies in 23 Developed Markets Countries. The Index is designed for investors seeking a broad, diversified sustainability benchmark with relatively low tracking error to the underlying equity market. The Index is a member of the MSCI Global Sustainability Index series. Constituent selection is based on data from MSCI ESG Research.

The Fund may use derivatives and other financially linked instruments (such as currency forwards and exchange traded futures) to achieve its objective and to reduce risk, minimise costs or generate additional capital or income.

**Target Market:** This Fund is appropriate for clients who plan to invest over the long term; for example 5 years or more; and are looking for a passively managed investment in the relevant market(s) with exposure to companies with high ESG performance relative to their sector peers based on MSCI's ESG ratings and ESG principles implemented according to a defined set of exclusions. This Fund may be appropriate for clients who seek a fund which features tax transparency.

Income gains on your units can either be distributed or re-invested annually at your request.

You can buy or sell units daily (on each business day of the Fund). An application must be received by the Fund's administrator before 12.00pm (Irish time) on the business day prior to the relevant dealing day.

## Risk and Reward Profile

Lower risk ← Higher risk  
Potentially lower reward ← Potentially higher reward

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The rating is based upon changes in prices of the equities held by the Fund. Investments in other countries are affected by exchange rate risk, where the currencies may fluctuate in value.

Performance volatility can be increased or reduced due to fluctuations in the currencies represented within this document.

The following risks are material in addition to the risks captured by the indicator above:

**Liquidity Risk** – Some recognised exchanges are less liquid or more volatile which may affect the price received and time taken when selling investments. Small capitalisation companies are also less liquid and this may result in fluctuations in the price of shares.

**Investment Risk** - The Fund may not achieve its investment objective. An investment in any Fund involves investment risks including possible loss of the amount invested.

**Futures and Options Risk** - In case of bankruptcy of the broker, there is no guarantee collateral held by the broker will be returned to the Fund. In the event of bankruptcy of the counterparty, the option premium and any unrealised gains may be lost.

**Valuation Risk** - A position in the Fund may be valued incorrectly, as some prices may be uncertain at a point in time.

For more information about risks, please see the section entitled "Risk Factors" of the Fund's prospectus and supplement, which are available at [www.northerntrust.com/pooledfunds](http://www.northerntrust.com/pooledfunds).
