# 1 INVESTMENT OBJECTIVE, POLICIES AND STRATEGIES

## Investment Objective

The investment objective of the Fund is to deliver a high quality portfolio that emphasises stable, long-term capital growth by investing in stocks with a high combination of quality and dividend yield, while controlling for market risk and excluding stocks that do not meet certain environment, social, and governance (ESG) criteria.

## Investment Policies

The Fund seeks to achieve its investment objectives through investment primarily in a diversified portfolio of transferable Equity and (where considered by the Investment Manager to be necessary or appropriate) Equity Related Securities issued by companies or linked to companies within the MSCI World Index (the **Index**), with a high combination of quality (which the Manager will determine based on a proprietary quantitative methodology which focuses on indicators of management efficiency, profitability, and cash availability) and dividend yield, while constructing the portfolio in a manner which seeks to control the variation of returns as compared to the Index by actively limiting exposures to security, industrial sector, region / country, and other risk factors relative to those in the Index.

All non-dividend paying companies are excluded from investment consideration and dividend paying companies are ranked in quality from 1 to 5 using a proprietary, quantitative, sector-neutral scoring method. The lowest-quality companies are excluded from investment consideration. Additionally, stocks that do not meet certain ESG criteria selected by the Manager are excluded from consideration: i) companies that are in breach of the UN's Global Compact Ten Principles due to being involved in controversies classified as "very severe" in the areas of Environment, Human Rights & Community, Labour Rights & Supply Chain, or Governance ii) companies that derive any revenue from the production of tobacco, or 5% or more revenue from the distribution of, supply of key products for, or retail of tobacco, iii) companies that manufacture cluster bombs, landmines, nuclear weapons, depleted uranium weapons, biological/chemical weapons, or their strategic components, iv) companies that manufacture civilian firearms or are otherwise involved in business with such companies and derive 5% or more revenue from this sector, and v) companies that manufacture conventional weapons or are otherwise involved in business with such companies and derive 5% or more revenue from this sector. The portfolio is constructed focusing on companies of similar size in aggregate to those in the Index but may also hold up to 20% of Net Asset Value in Equity and Equity Related Securities that are not in the Index. Any such Equity and Equity Related Securities outside the Index shall meet the Manager's quality criteria and dividend yield requirements (as referred to above) and shall be listed on recognised exchanges in countries that form part of the Index. The portfolio is constructed using stock selection designed to emphasise companies exhibiting both high quality and high dividend yield, while seeking to control unintentional risks from other factors. These may include style (growth or value), region / country, sector / industry, or other risk factors.

The Fund is expected under normal market conditions to generate dividend yield of approximately 1.5 to 2.5 times the dividend yield of the Index.

"Equity and Equity Related Securities" includes but is not limited to equities, depositary receipts, preferred shares, equity linked notes (unleveraged debt securities linked to the performance of equities), warrants (not more than 5% of the Fund's Net Asset Value) and convertible securities (such as convertible preference shares, share purchase rights and bonds convertible into common or preferred shares). Such Equity and Equity Related Securities shall be listed on stock exchanges or regulated markets in countries (within the list of Regulated Markets) comprised within the Index, details of which are set out below under

the heading "Index Description". Where direct access to the equity markets in those countries is not practicable, indirect exposure may be achieved through investment in Equities and/or Equity Related Securities listed on markets elsewhere.

The Fund will measure its performance against the Index. The Fund may invest in FDI for efficient portfolio management purposes and may be fully or partially hedged back to the Base Currency in accordance with the powers and restrictions set out by the Central Bank in relation to techniques for efficient portfolio management purposes as further disclosed in section 3.5 entitled "Hedging" in the Prospectus. The Fund may invest in FDI as set out in the section titled "Efficient Portfolio Management (EPM) and Use of Derivatives" below.

The Fund may also invest (up to 10% of its Net Asset Value) indirectly in Equities and Equity Related Securities comprised within the Index through holdings in open-ended collective investment schemes (CIS) (including UCITS exchange traded funds (ETFs)). Any such CIS will have investment objectives which are materially similar to the Fund.

The Fund will act in accordance with rules regarding cluster munitions laid down in the relevant national legislation adopting the Convention on Cluster Munitions. Consequently, the Fund will take adequate measures to restrict it from: (i) executing or procuring the execution of transactions aimed at acquiring or offering financial instruments issued by a company involved in the production, sale or distribution of cluster munition or critical elements thereof ("**Cluster Munition Companies**"); or (ii) extending loans to or acquiring transferable shares in Cluster Munition Companies. In addition, the Fund is restricted from: (i) executing or procuring the execution of transactions aimed at acquiring or offering financial instruments issued by a company which holds more than fifty (50) per cent of the share capital of Cluster Munition Companies; or (ii) extending loans to or acquiring transferable shares in such parent companies.

However, the Fund is not restricted from (i) investing in investment institutions managed by third parties provided that the relevant investment institution consists for less than five (5) per cent of Cluster Munition Companies; and (ii) investing in specifically described projects of Cluster Munition Companies, provided that the invested funds will not be used for the production, sale or distribution of cluster munition. For the definition of "cluster munition", please see to article 2(2) of the Convention on Cluster Munitions which was adopted on 30 May 2008 in Dublin, Ireland and entered into force on 1 August 2010.

### **Index Description**

The Index is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed markets. As at the date of the supplement, the Index consists of the following twenty-three (23) developed market country indices: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Israel, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States. The Index does not have any restrictions on industry or sector focus.

The valuation function within MSCI is functionally independent of the design of the Index. The Index is reviewed quarterly for any necessary rebalancing – in February, May August and November, with the objective of reflecting change in the underlying equity markets in a timely manner, while limiting undue index turnover. The rebalancing frequency will have minimal impact on the strategy of the Fund or on transaction costs associated with the Fund as any rebalancing is not expected to require any higher frequency of position turnover in the Fund than would otherwise be the case. Further details of the Index constituents, weightings and methodology can be navigated to from the following links:

<https://www.msci.com/index-methodology> and

<https://www.msci.com/constituents>.

In accordance with Regulation (EU) 2016/1011 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the EU Benchmarks Regulation) the Investment Manager has, on behalf of the Manager, put in place written plans which would enable the Fund to reference an alternative index, should the Index cease to be provided.

The Index used by the Fund in accordance with Article 3(1)(7)(e) of the EU Benchmarks Regulation is to be provided by an administrator either included in the register referred to in Article 36 of the EU Benchmarks Regulation or availing of the transitional arrangements pursuant to Article 51 of the EU Benchmarks Regulation.

### **Efficient Portfolio Management (EPM) and Use of Derivatives**

The purpose of EPM should be in line with the best interests of Unitholders and is to achieve one or more of the following: the reduction of risk, the reduction of costs and the generation of additional capital or income for the Fund with an acceptably low level of risk. The Fund may use the following instruments for EPM namely: currency forwards and exchange traded futures (details of which are outlined below).

#### **Exchange Traded Futures**

Exchange traded futures are used exclusively for efficient portfolio management purposes, mainly to "equitise" cash contributions into the Fund, hedge index exposure for limited periods when immediate purchase/sale of the underlying is not feasible or in the best interests of the Fund and gain short term exposure to securities where appropriate to enhance value. Exchange-traded futures positions are typically unwound simultaneously with the purchase or sale of the underlying cash position.

#### **Forwards**

Forward currency contracts may be used to hedge against currency risk that has resulted from assets held by the Fund that are not in the Base Currency. The Fund, may, for example, use forward currency contracts by selling forward a foreign currency against the Base Currency to protect the Fund from foreign exchange rate risk that has risen from holding assets in that currency.

Warrants, share purchase rights and convertible securities may also be held for the purposes of EPM and traded or exercised when considered appropriate.

The Fund may engage in transactions in FDI identified above for the purposes of EPM and/or to protect against exchange risks within the conditions and limits laid down by the Central Bank from time to time. Such transactions may include foreign exchange transactions and while seeking to protect against exchange risks may still alter the currency characteristics of transferable securities held by the Fund. Please see section 3.5 entitled "Hedging" in the Prospectus for more details.

Collateral or margin may be passed by the Fund to a counterparty or broker in respect of OTC FDI transaction. Further details of the Fund's collateral policy are set out in Schedule II section 8 of the Prospectus.

The use of FDI for the purposes outlined above may expose the Fund to the risks disclosed in the Prospectus under the heading "Risk Factors".

The Manager on behalf of the Fund has filed with the Central Bank its risk management process which enables it to accurately measure, monitor and manage the various risks associated with the use of FDI. Any FDI not included in the risk management process will not be utilised until such time as a revised submission has been provided to, and cleared by, the Central Bank. The Manager will, on request, provide supplementary information to Unitholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of Investments.

The Fund shall not engage in any securities lending or use repurchase agreements/reverse repurchase agreements (i.e. Securities Financing Transactions) and this section will be updated in accordance with the Central Bank Rules and the disclosure requirements of Regulation 2015/2365 in advance of any change in this regard.

**The general investment restrictions set out in the Prospectus under the heading "Investment Restrictions" apply to the Fund.**

## **3 BORROWING AND LEVERAGE**
