Supplement dated 28 February 2019 to the Prospectus dated 23 June 2017

For Northern Trust UCITS Common Contractual Fund

This Supplement contains specific information in relation to the Northern Trust North America Value ESG Fund (the **Fund**), a Sub-Fund of the Northern Trust UCITS Common Contractual Fund, an open-ended umbrella common contractual fund governed by the laws of Ireland, and authorised by the Central Bank.

Northern Trust UCITS Common Contractual Fund, initially called the Northern Trust Non-UCITS Common Contractual Fund, was initially constituted on 14 October 2009 by the Deed of Constitution entered into between the Manager and the Depositary and was previously authorised in 14 October 2009 by the Central Bank pursuant to the provisions of the Investment Funds, Companies and Miscellaneous Provisions Act 2005. Pursuant to an amended and restated Deed of Constitution dated 20 January 2012, Northern Trust UCITS Common Contractual Fund was reauthorised by the Central Bank as a UCITS pursuant to the Regulations on 20 January 2012.

This Supplement forms part of and should be read in conjunction with the Prospectus dated 23 June 2017.

The Directors of the Manager, whose names appear under the section titled "Directors of the Manager" in the Prospectus, accept responsibility for the information contained in the Prospectus and this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) such information is in accordance with the facts and does not omit anything likely to affect the import of such information. The Directors accept responsibility accordingly.

Words and expressions defined in the Prospectus shall, unless the context otherwise requires or as otherwise provided herein, have the same meaning when used in this Supplement.

The Fund may invest in FDI for hedging and efficient portfolio management purposes. (See "Borrowing and Leverage" below for details of the leverage effect of investing in FDI).

The Manager may apply a Redemption Charge of up to one (1) per cent of the Net Asset Value. The difference at any one time between the sale and repurchase price of Units means that an investment in the Fund should be viewed as medium to long term.

1 INVESTMENT OBJECTIVE, POLICIES AND STRATEGIES

Investment Objective

The investment objective of the Fund is to deliver long-term capital growth by investing in securities which exhibit value, quality and momentum factors excluding securities that do not meet certain environmental, social and governance (**ESG**) criteria.

Investment Policy

The Fund seeks to achieve its investment objective through investment primarily in a diversified portfolio of transferable Equity and (where considered by the Investment Manager to be necessary or appropriate) Equity Related Securities issued by companies or linked to companies within the MSCI North America Index (the "**Index**"), which exhibit value, quality and momentum factors (determined based on a proprietary quantitative methodology), whilst constraining the exposure to certain securities in accordance with the ESG criteria and Investment Manager's scoring as further detailed below, exposure by industry and exposure by region and country, as well as exposures to other risk factors relative to the Index. Further details concerning the Index are set out below.

The investment process is to establish the securities eligible for investment by excluding from the list of securities within the Index, companies that: (i) are in breach of the UN's Global Compact Ten Principles due to being involved in controversies classified as "very severe" in the areas of Environment, Human Rights & Community, Labour Rights & Supply Chain, or Governance; ii) derive any revenue from the production of tobacco, or 5% or more of their revenue from the distribution of tobacco, supply of key products for the production of tobacco, or the retail of tobacco; iii) manufacture cluster bombs, landmines, nuclear weapons, depleted uranium weapons, biological/chemical weapons, or their related components; iv) companies that manufacture civilian firearms or are otherwise involved in business with such companies and derive 5% or more revenue from this sector; and v) companies that manufacture conventional weapons or are otherwise involved in business with such companies and derive 5% or more revenue from this sector.

The next step is to apply the Investment Manager's proprietary scoring which is constructed using data from multiple sources including company financial statements and historical stock price movements. The scoring is applied to all of the investible securities based on value, quality and momentum factors with relative return forecasts. This enables the construction of an optimal portfolio which maximises expected risk-adjusted performance based on the return forecasts. As noted above, risk is controlled by limiting the exposure to certain securities, exposure by industry and exposure by region and country, as well as exposures to other risk factors relative to the Index. The Fund's holdings and exposures are regularly monitored, and, where appropriate, traded efficiently using the aforementioned portfolio construction process to ensure alignment with the investment objectives.

"Equity and Equity Related Securities" includes but is not limited to equities, depositary receipts (such as Global Depositary Receipts and American Depositary Receipts), preferred shares, equity linked notes (unleveraged debt securities linked to the performance of equities), warrants (not more than 5% of a Fund's Net Asset Value), convertible securities (such as convertible preference shares, share purchase rights and bonds convertible into common or preferred shares). Such Equity and Equity Related Securities shall be listed on stock exchanges or regulated markets (within the list of Regulated Markets) comprised within the Index and therefore located in the USA. The Fund may from time to time hold securities which are not included in the Index constituents as a result of corporate actions and other such

activities. In such event, the Fund will sell such securities as soon as practicable taking into account the best interests of the Unitholders.

The Fund may invest in FDI for efficient portfolio management purposes and may be fully or partially hedged back to the Base Currency in accordance with the powers and restrictions set out by the Central Bank in relation to techniques for efficient portfolio management purposes as further disclosed in section 3.5 entitled "Hedging" in the Prospectus. The Fund may invest in FDI as set out in the section titled "Efficient Portfolio Management (EPM) and Use of Derivatives" below.

The Fund may also invest (up to 10% of its Net Asset Value) indirectly in Equities and Equity Related Securities comprised within the Index through holdings in open-ended collective investment schemes (CIS) (including UCITS exchange traded funds (ETFs)). Any such CIS will have investment objectives which are materially similar to the Fund.

The Fund will act in accordance with rules regarding cluster munitions laid down in the relevant national legislation adopting the Convention on Cluster Munitions. Consequently, the Fund will take adequate measures to restrict it from: (i) executing or procuring the execution of transactions aimed at acquiring or offering financial instruments issued by a company involved in the production, sale or distribution of cluster munition or critical elements thereof ("Cluster Munition Companies"); or (ii) extending loans to or acquiring transferable shares in Cluster Munition Companies. In addition, the Fund is restricted from: (i) executing or procuring the execution of transactions aimed at acquiring or offering financial instruments issued by a company which holds more than fifty (50) per cent of the share capital of Cluster Munition Companies; or (ii) extending loans to or acquiring transferable shares in such parent Companies.

However, the Fund is not restricted from (i) investing in investment institutions managed by third parties provided that the relevant investment institution consists of less than five (5) per cent of Cluster Munition Companies; and (ii) investing in specifically described projects of Cluster Munition Companies, provided that the invested funds will not be used for the production, sale or distribution of cluster munition. For the definition of "cluster munition", please see to article 2(2) of the Convention on Cluster Munitions which was adopted on 30 May 2008 in Dublin, Ireland and entered into force on 1 August 2010.

Index Description

The Index is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of the North American markets, namely the U.S. and Canada.

The valuation function within MSCI is functionally independent of the design of the Index. The Index is reviewed quarterly for any necessary rebalancing – in February, May, August and November with the objective of reflecting change in the underlying equity markets in a timely manner, while limiting undue index turnover.

Further details of the Index constituents, weightings and methodology can be navigated to from the following links: <https://www.msci.com/index-methodology> and <https://www.msci.com/constituents>.

In accordance with Regulation (EU) 2016/1011 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the EU Benchmarks Regulation) the Investment Manager has, on behalf of the Manager, put in

place written plans which would enable the Fund to reference an alternative index, should the Index cease to be provided.

The Index used by the Fund in accordance with Article 3(1)(7)(e) of the EU Benchmarks Regulation is to be provided by an administrator either included in the register referred to in Article 36 of the EU Benchmarks Regulation or availing of the transitional arrangements pursuant to Article 51 of the EU Benchmarks Regulation.

Efficient Portfolio Management (EPM) and Use of Derivatives

The purpose of EPM should be in line with the best interests of Unitholders and is to achieve one or more of the following: the reduction of risk, the reduction of costs and the generation of additional capital or income for the Fund with an acceptably low level of risk. The Fund may use the following instruments for EPM namely: currency forwards and exchange traded futures (details of which are outlined below).

Exchange Traded Futures

Exchange traded futures (such as index futures and equity futures) are used exclusively for efficient portfolio management purposes, mainly to “equitise” cash contributions into the Fund, hedge index exposure for limited periods when immediate purchase/sale of the underlying is not feasible or in the best interests of the Fund or generate additional capital or income with a level of risk consistent with the risk profile of the Fund by gaining short term exposure to securities. Exchange-traded futures positions are typically unwound simultaneously with the purchase or sale of the underlying cash position.

Forwards

Forward currency contracts may be used to hedge against currency risk that has resulted from assets held by the Fund that are not in the Base Currency. The Fund, may, for example, use forward currency contracts by selling forward a foreign currency against the Base Currency to protect the Fund from foreign exchange rate risk that has risen from holding assets in that currency.

The Fund may engage in transactions in FDI identified above for the purposes of EPM and/or to protect against exchange risks within the conditions and limits laid down by the Central Bank from time to time. Such transactions may include foreign exchange transactions and while seeking to protect against exchange risks may still alter the currency characteristics of transferable securities held by the Fund. Please see section 3.5 entitled “Hedging” in the Prospectus for more details.

The Fund shall not engage in any securities lending or use repurchase agreements/reverse repurchase agreements (i.e. Securities Financing Transactions) and this section will be updated in accordance with the Central Bank Rules and the disclosure requirements of Regulation 2015/2365 in advance of any change in this regard.

Collateral or margin may be passed by the Fund to a counterparty or broker in respect of OTC FDI transaction. Further details of the Fund's collateral policy are set out in Schedule II section 8 of the Prospectus.

The use of FDI for the purposes outlined above may expose the Fund to the risks disclosed under the section of the Prospectus entitled “**Risk Factors**”.

The Manager on behalf of the Fund has filed with the Central Bank its risk management process which enables it to accurately measure, monitor and manage the various risks associated with the use of FDI. Any FDI not included in the risk management process will not

be utilised until such time as a revised submission has been provided to the Central Bank. The Manager will, on request, provide supplementary information to Unitholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of Investments.

2 RESPONSIBLE INVESTMENT – CORPORATE ENGAGEMENT

The Investment Manager has appointed Hermes Equity Ownership Services Limited ("Hermes EOS") to act as the Investment Manager's agent in carrying out corporate engagement with carefully selected companies held within the Fund (each a "Company"). Companies will be selected for engagement and engagement will be carried out in accordance with an Engagement Policy, a copy of which is available from the Investment Manager on request. The engagement process neither informs investment or divestment decisions nor the construction of the Index, and Hermes EOS will exercise no discretion over Fund Assets.

An engagement by Hermes EOS with a Company will involve a process of dialogue with that Company with the long-term objective of that Company improving on its social, ethical and environmental practices in the belief that such factors can have an impact on financial performance.

Hermes EOS typically conducts engagement with Companies in confidence and will not disclose the Investment Manager's involvement in such engagements, unless specifically agreed in advance.

In addition to engaging with individual Companies, Hermes EOS has a broad international public policy engagement program through which it engages with governments and regulators on behalf of its client base (including the Investment Manager) to promote the interests of long-term institutional investors.

The Fund follows the Northern Trust Proxy Voting Policy, a copy of which is available via the following website:

<https://www.northerntrust.com/asset-management/europe/uk-stewardship-proxy-voting>

Engagement activities conducted on behalf of the Fund may not always be complemented by this policy.
