Northern Trust Emerging Markets Custom ESG Equity Index UCITS FGR Fund (the "Fund") Unit Class B EUR Distributing

A sub-fund of Northern Trust UCITS FGR Fund

ISIN: NL0011515432

Management Company: Northern Trust Fund Managers (Ireland) Limited

OBJECTIVES AND INVESTMENT POLICY

The investment objective of the Fund is to closely match the risk and return characteristics of the MSCI Emerging Markets Custom ESG Index (the "Index") with net dividends reinvested.

The Fund invests in equities (that is, shares and other similar kinds of assets) issued by or relating to companies included in the Index.

Target Market: This Fund is appropriate for investors who plan to invest over the medium to long term; and are looking for a passively managed investment in the relevant market(s) with Environmental, Social and Governance (ESG) principles implemented according to a defined set of exclusions.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This Fund may be appropriate for investors who can benefit from the tax status of the FGR fund range.

The Fund is an index tracking fund which seeks to track the risk and return characteristics of the Index by buying most or all of the stocks of the Index. This means it may not hold all the same assets as the Index or hold assets in the same proportion as the Index, and the fund may not match the Index performance.

The Index is a custom index which corresponds with the MSCI Emerging Markets Index with the exclusion of companies not considered to meet socially responsible

principles identified by applying criteria that refer to the UN Global Compact ten principles, as well as other ESG criteria selected by the investment manager. For further details on the UN Global Compact Principles please refer to www.unglobalcompact.org/AboutTheGC/TheTenPrinciples/index.html.

For efficient portfolio management purposes the Fund may invest in derivatives and other financially linked instruments (such as currency forwards and exchange traded futures) to reduce risk, minimise costs or generate additional capital or income. A derivative is a financial contract whose value is derived from other assets.

Income gains on your units can either be re-invested or distributed semi-annually at your request.

You can buy or sell units daily (on each business day of the Fund). An application must be received by the Fund's administrator before 2.00pm (Dutch time) on the business day prior to the relevant dealing day.

The B, D, F, H, J, L, N, P, R, T, V, X and Z Classes of Units are issued to Investors which are exempt from income tax or entitled to a full refund of Dutch dividend withholding tax and for which the Fund is not entitled to a full tax rebate.

The base currency of the Fund is Euro.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The rating is based upon changes in prices of the equities held by the Fund. The Fund mainly invests in shares of emerging markets that are more likely to experience sharp rises and falls in value.

Investments in the relevant countries are affected by exchange rate risk, particularly with some emerging markets where the currencies may fluctuate significantly in value. Performance volatility can be increased or reduced due to fluctuations in the currencies represented within this document.

The following risks are material in addition to the risks captured by the indicator above:

Liquidity Risk – Some recognised exchanges are less liquid or more volatile which may affect the price received and time taken when selling investments. Small

capitalisation companies are also less liquid and this may result in fluctuations in the price of shares.

Investment Risk - The Fund may not achieve its investment objective. An investment in the Fund involves investment risks including possible loss of the amount invested.

Counterparty Risk - In case of bankruptcy of the broker, there is no guarantee collateral held by the broker will be returned to the Fund. In the event of bankruptcy of the counterparty, the premium and any unrealised gains may be lost.

Derivative Risk - Derivatives may result in gains or losses that are greater than the original amount invested.

Valuation Risk - A position in the Fund may be valued incorrectly, as some prices may be uncertain at a point in time.

Currency Risk - Where a class of shares are in a currency other than the base currency of the fund, the non-base share classes of the Fund may be affected unfavourably by fluctuations in currency rates.

Emerging Markets Risk - Emerging markets are generally more sensitive to economic and political conditions than developed markets and so may be more volatile.

Disclosure and regulatory standards may be less stringent, the legal infrastructure may not provide the same degree of shareholder protection and the Fund may encounter restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments.

For more information about risks, please see the section entitled "Risk Factors" of the Fund's prospectus and supplement at www.fgrinvesting.com/en/.
