

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

The NT Emerging Markets Custom Equity Index Fund: Share Class A USD A Fund of Northern Trust Investment Funds plc

ISIN: IE00BJ625R46

Management Company: Northern Trust Fund Managers (Ireland) Limited

OBJECTIVES AND INVESTMENT POLICY

The investment objective of the Fund is to track the risk and return characteristics of the Northern Trust Index on MSCI Emerging Markets (the Index). The Index is designed to measure the equity market performance of companies in Emerging Markets, with reduced exposure to certain securities based on environmental, social and governance criteria in comparison to MSCI Emerging Markets Index (the Parent Index).

The Fund invests in equities (that is, shares and other similar kinds of assets) issued by or relating to companies included in the Index.

The equities will be traded on stock exchanges in the countries included in the Index. These countries include Brazil, Chile, China, Columbia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Qatar, Russia, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates.

The Fund uses a sample based physical replication model whereby it seeks to track the risk and return characteristics of the Index by buying most or all of the stocks of the Index. This means it may not hold all the same assets as the Index or hold assets in the same proportion as the Index, and therefore the fund may not match the Index performance.

The Index is designed to measure the equity market performance of companies in Emerging Markets, with reduced exposure to certain securities based on environmental, social and governance criteria in comparison to MSCI Emerging Markets Index (the "Parent Index"). The Index is a custom index, built by MSCI by taking the Parent Index and applying an additional screening, based on an exclusion list made up of companies considered to be in breach of international conventions on environmental and human rights. For further details of the Parent Index and the Index please refer to: <https://www.msci.com/constituents>

and <https://www.msci.com/custom-indexes>. For further details on the exclusion list criteria, please refer to: <http://www.ap4.se/en/esg/excluded-companies/> and for information on the systematic process applied in the creation of the exclusion list please refer to: <http://etikradet.se/?lang=en>.

The Fund may use derivatives and other financially linked instruments (such as currency forwards and exchange traded futures) to achieve its objective and to reduce risk, minimise costs or generate additional capital or income.

The Fund may also lend its assets to third parties in order to generate additional income.

Target Market: This Fund is appropriate for clients who plan to invest over the long term; for example 5 years or more; and are looking for a passively managed investment in the relevant market(s) with ESG principles implemented according to a defined set of exclusions.

The Fund is designed for institutional investors including but not limited to: national and multi-national corporations, pension funds, insurance companies, sovereign wealth funds, charities and fiduciary managers. A typical investor is a sophisticated investor prepared to accept a degree of medium to high volatility.

The shares in the Fund are either accumulating or distributing. If you elect accumulating shares, any income received will always be included in the value of your shares. If you elect distributing shares, any income received will be distributed annually, and you can request either a cash payment or additional shares in the Fund.

You can buy or sell shares daily (on each business day of the Fund). Instructions must be received by the Fund's administrator before 12.00 (Irish time) on the business day prior to the relevant dealing day.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The rating is based upon changes in prices of the equities held by the Fund. The Fund mainly invests in shares of emerging markets that are more likely to experience sharp rises and falls in value.

Investments in the relevant countries are affected by exchange rate risk, particularly with some emerging markets where the currencies may fluctuate significantly in value.

There is an increased chance of political and economic instability with less reliable safekeeping, dealing and settlement arrangements.

Performance volatility can be increased or reduced due to fluctuations in the currencies represented within this document.

The following risks are material in addition to the risks captured by the indicator above:

Liquidity Risk – Some recognised exchanges are less liquid or more volatile which may affect the price received and time taken when selling investments.

Small capitalisation companies are also less liquid and this may result in fluctuations in the price of shares.

Investment Risk - The Fund may not achieve its investment objective. An investment in any Fund involves investment risks including possible loss of the amount invested.

Futures and Options Risk - In case of bankruptcy of the broker, there is no guarantee collateral held by the broker will be returned to the Fund. In the event of bankruptcy of the counterparty, the option premium and any unrealised gains may be lost.

Valuation Risk - A position in the Fund may be valued incorrectly, as some prices may be uncertain at a point in time.

Securities Lending Risk - The principal risk is the insolvency of the borrower. In this event the lending agent will use the collateral to repurchase the loaned securities in the market, but in the time it takes to do so the value of collateral may fall and be insufficient to repurchase the securities. Where collateral is received in the form of cash, there are additional risks of reinvestment such as market and credit risks.

Emerging Markets Risk - Emerging markets are generally more sensitive to economic and political conditions than developed markets and so may be more volatile. Disclosure and regulatory standards may be less stringent, the legal infrastructure may not provide the same degree of shareholder protection and the Fund may encounter restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments.

For more information about risks, please see the section entitled "Risk Factors" of the Fund's prospectus and supplement, which are available at www.northerntrust.com/pooledfunds.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	No charge
Exit charge	2.00 %
This is the maximum that might be taken out of your money before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.36 %
Charges taken from the Fund under certain specific conditions	
Performance fee	No charge

The entry and exit charges shown are maximum figures and in some cases you may pay less.

A charge of up to 1% may also be applied to your investment to meet any transaction costs. Contact your financial advisor or distributor for actual entry/exit charges.

As this Share Class has yet to launch, the on-going charges figure is based on estimated expenses. This may vary from year to year. It excludes:

- o Performance fees;
- o Portfolio transaction costs, except in the case of any entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see the section entitled "Fees and Expenses" of the Fund's supplement to the prospectus, which is available at www.northerntrust.com/pooledfunds.

PAST PERFORMANCE

- The Fund was launched in 2014. This share class is unlaunched.
- There is insufficient data to provide a useful indication of past performance to investors.

PRACTICAL INFORMATION
