INVESTMENT OBJECTIVE AND POLICIES

Investment Objective

The investment objective of the Fund is to closely match the risk and return characteristics of the MSCI North America Index (the **Index**). Any change in the Index shall only be made with the prior approval of the Shareholders.

Investment Policies

The Fund will invest in freely transferable Equity and Equity Related Securities issued by companies or linked to companies making up the Index. Such securities are currently listed/traded on stock exchanges in the USA and Canada and are issued by companies which are also listed on stock exchanges located in these countries. This list may vary from time to time but will always be consistent with the list of Markets set out in Appendix I of the Prospectus. The Fund may from time to time hold securities which are not included in the Index constituents as a result of corporate actions and other such activities.

Index Tracking Strategy

The Fund operates an index tracking strategy whereby it seeks to track the risk and return characteristics of the Index by investing directly in assets that are Index constituents (i.e. a physical replication model). However, the Fund does not seek to fully replicate the Index but instead seeks to match the Fund's investments with Index constituents on a sample based physical replication model (i.e. an optimisation approach) within the scope of the general UCITS investment restrictions and the specific investment restrictions set out below. Accordingly, investment in the Fund should not be considered to provide a direct exposure to the Index. In normal market conditions the Fund can be expected to closely match the performance of the Index. However, in normal market conditions an ex-post tracking error of 0.00% – 0.10% should be anticipated. This is due to transaction costs and the liquidity impact of the Fund's optimisation approach. Employing an optimisation approach (rather than full replication) necessarily results in individual security overweights and underweights, as the Fund will strive to achieve representative exposure in the more liquid and accessible sectors of the Index.

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk related to the index replication strategy.

Index Description

The Index forms part of the MSCI Standard Index Series. The Index is a free float-adjusted market capitalisation Index that is designed to measure developed market equity Net Total Return in the North America region.

The MSCI Standard Index Series covers the large- and mid-cap segments of the Global Investable Market Index equity universe and targets 85% of free float-adjusted market capitalization in each industry group, in each country. Currently, MSCI calculates the Standard Index Series for more than 56 countries globally in the developed and the emerging markets.

The valuation function within MSCI is functionally independent of the design of the Index. The Index is reviewed quarterly for any necessary rebalancing – in February, May, August and November, with the objective of reflecting change in the underlying equity markets in a timely manner, while limiting undue index turnover. The rebalancing frequency will have minimal impact on the strategy of the Fund or on transaction costs associated with the Fund as any rebalancing is not expected to require

any higher frequency of position turnover in the Fund than would otherwise be the case.

Further details of the Index constituents, weightings and methodology can be navigated to from the following links: <https://www.msci.com/index-methodology> and <https://www.msci.com/constituents>.

In accordance with Regulation (EU) 2016/1011 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the **EU Benchmarks Regulation**) the Investment Manager has, on behalf of the Manager, put in place written plans which would enable the Fund to reference an alternative index, should the Index cease to be provided.

The Index used by the Fund in accordance with Article 3(1)(7)(e) of the EU Benchmarks Regulation is to be provided by an administrator either included in the register referred to in Article 36 of the EU Benchmarks Regulation or availing of the transitional arrangements pursuant to Article 51 of the EU Benchmark Regulation.

PROFILE OF A TYPICAL INVESTOR

The Fund is designed for institutional investors including but not limited to: national and multi-national corporations, pension funds, insurance companies, sovereign wealth funds, charities and fiduciary managers. A typical investor is a sophisticated investor prepared to accept a degree of medium to high volatility. A typical investor will be seeking to achieve exposure across North American equities and will be seeking to achieve a return on investment in the medium to long term.

RESPONSIBLE INVESTMENT – CORPORATE ENGAGEMENT

The Investment Manager has appointed Hermes Equity Ownership Services ("Hermes EOS") to act as the Manager's agent in carrying out corporate engagement with carefully selected companies held within the Fund (each an "Engaged Company"). Engaged Companies will be selected for engagement and engagement will be carried out in accordance with an Engagement Policy, a copy of which is available from the Investment Manager on request. The engagement process neither informs investment or divestment decisions nor the construction of the Index, and Hermes EOS will exercise no discretion over Fund assets.

An engagement by Hermes EOS with an Engaged Company will involve a process of dialogue with that Engaged Company with the long-term objective of that Engaged Company improving on its social, ethical and environmental practices in the belief that such factors can have an impact on financial performance.

Hermes EOS typically conducts engagement with Engaged Companies in confidence and will not disclose the Manager's involvement in such engagements, unless specifically agreed in advance.

In addition to engaging with individual Engaged Companies, Hermes EOS has a broad international public policy engagement program through which it engages with governments and regulators on behalf of its client base (including the Manager) to promote the interests of long-term institutional investors.

The Fund will follow the Northern Trust Proxy Voting Policy, a copy of which is available via the following website:

<https://www.northerntrust.com/asset-management/europe/uk-stewardship-proxy-voting>

Engagement activities conducted on behalf of the Fund may not always be complemented by this policy.

Use of repurchase/reverse repurchase agreements and Total Return Swaps, by the Fund is not envisaged. In any case the most recent semi-annual and annual report of the Company will express as an absolute amount and as a percentage of the Fund's assets the amount of Fund assets subject to Securities Financing Transactions.

Collateral or margin may be passed by the Fund to a counterparty or broker in respect of Efficient Portfolio Management Techniques or Securities Financing Transactions. Please refer to the section of the Prospectus entitled "Collateral Policy" for further details.
